In today's complex and ever-changing global security landscape, effective collaboration and coordination among different military branches are paramount. The ability to execute joint operations seamlessly requires a shared understanding of tactics, techniques, and procedures (TTPs) across the services.

To address this critical need, the U.S. Department of Defense has developed a comprehensive set of joint doctrine publications that provide guidance on multiservice operations. These publications include:

- FM 11-21: Joint Tactics, Techniques, and Procedures for Close Combat
- MCP 37-2C: Joint Doctrine for Countering Air and Missile Threats
- Nttp 11-24: Joint Tactics, Techniques, and Procedures for Fire Support
- AFTTP 37: Joint Doctrine for Air and Missile Defense

These publications are essential reading for military personnel involved in joint operations, from strategic planners to frontline troops. They provide a common framework for understanding multiservice concepts, enabling effective coordination and execution of joint missions.

FM 11-21: Joint Tactics, Techniques, and Procedures for Close Combat

FM 11-21 outlines the fundamental principles of close combat for joint forces. It covers topics such as:

- Planning and conducting close combat operations
- Fire and movement techniques
- Urban operations
- Counterinsurgency operations

FM 11-21 provides detailed guidance on how to integrate different military branches into a cohesive fighting force, ensuring effective coordination and minimizing fratricide.

MCP 37-2C: Joint Doctrine for Countering Air and Missile Threats

MCP 37-2C provides comprehensive guidance on countering air and missile threats in joint operations. It covers topics such as:

- Air and missile defense planning and operations
- Detection and tracking of air and missile threats
- Intercept and destruction of air and missile threats
- Coordination and integration of air and missile defense assets

MCP 37-2C is essential reading for personnel involved in air and missile defense operations, as well as for commanders and planners who need to understand the capabilities and limitations of air and missile defense systems.

Nttp 11-24: Joint Tactics, Techniques, and Procedures for Fire Support

Nttp 11-24 provides guidance on the planning and execution of fire support operations in joint operations. It covers topics such as:

- Fire support planning and coordination
- Fire support assets and capabilities
- Fire support coordination measures
- Fire support in urban operations

Nttp 11-24 is essential reading for personnel involved in fire support operations, as well as for commanders and planners who need to understand the capabilities and limitations of fire support assets.

AFTTP 37: Joint Doctrine for Air and Missile Defense

AFTTP 37 provides guidance on the planning and execution of air and missile defense operations in joint operations. It covers topics such as:

- Air and missile defense planning and coordination
- Air and missile defense assets and capabilities
- Air and missile defense coordination measures
- Air and missile defense in urban operations

AFTTP 37 is essential reading for personnel involved in air and missile defense operations, as well as for commanders and planners who need to understand the capabilities and limitations of air and missile defense assets.

FM 11-21, MCP 37-2C, Nttp 11-24, and AFTTP 37 are essential reading for military personnel involved in joint operations. These publications provide a common framework for understanding multiservice concepts, enabling effective coordination and execution of joint missions. By mastering the tactics, techniques, and procedures outlined in these publications, military personnel can enhance their combat readiness and contribute to the success of joint operations.
