

# Who Invented the Bicycle Kick? The Definitive Investigation

The bicycle kick is one of the most iconic and spectacular maneuvers in soccer. With its gravity-defying acrobatics and stunning visual appeal, the bicycle kick has captured the imagination of fans around the world.

But who invented the bicycle kick? The answer to this question is not entirely clear, as there are several players who have been credited with inventing the move.

## Who Invented the Bicycle Kick?: Soccer's Greatest Legends and Lore by Paul Simpson

## Early Origins

The earliest known example of a bicycle kick was performed by a Chilean player named Ramón Unzaga in 1914. Unzaga was playing for the Chilean national team in a match against Argentina when he executed the move. The goal was captured on film, and it is widely considered to be the first documented example of a bicycle kick.

However, there is some evidence that the bicycle kick may have been invented even earlier. In 1902, a French player named René Hanriot is said to have performed a similar move in a match against England.

Unfortunately, there is no film footage of this goal, so it is difficult to say for sure whether Hanriot was the true inventor of the bicycle kick.

## **The Modern Bicycle Kick**

The bicycle kick as we know it today was popularized by Mexican player Hugo Sánchez. Sánchez was a prolific goalscorer who was known for his acrobatic skills. He perfected the bicycle kick and used it to score many spectacular goals throughout his career.

Sánchez's bicycle kick was so iconic that it was even featured in the video game FIFA 98. The move became a staple of the FIFA series, and it is now one of the most popular moves in the game.

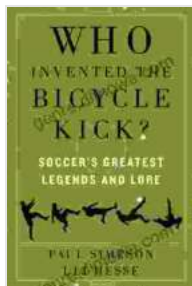

## **Who Gets the Credit?**

So who deserves the credit for inventing the bicycle kick? It is difficult to say for sure, as there is no clear consensus on the matter. However, there is no doubt that Ramón Unzaga, René Hanriot, and Hugo Sánchez all played a role in the development and popularization of the move.

Ultimately, the invention of the bicycle kick is a testament to the creativity and skill of the players who play the beautiful game.

The bicycle kick is one of the most iconic and spectacular moves in soccer. It is a move that requires both athleticism and skill, and it has captured the imagination of fans around the world.

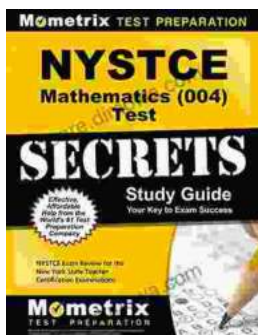

The invention of the bicycle kick is a mystery that may never be fully solved. However, there is no doubt that the move would not be what it is today without the contributions of Ramón Unzaga, René Hanriot, and Hugo Sánchez.
